

Zonta Club of Birmingham joins many women’s organizations in their call for federal legislation to restore fundamental protections that guarantee a woman's right to make the decision to have an abortion.

As an organization that aims to make life better for women and girls, Zonta Club of Birmingham stands firmly in the belief that a woman’s reproductive activity is her decision.

We recognize the value of the life of a young woman and her right to access critical reproductive healthcare, including safe abortion services, whether her pregnancy is planned, accidental, or the result of sexual assault.

The politicization of this issue and the catchphrases such as "pro-life" and “right to choose” have become deeply embedded in this conversation and have over-simplified the difficult, complicated circumstances that making this decision entails.

Zonta does not support any action or law that diminishes the value of a woman's life and we believe that the sanctity of life applies to all. For this reason, Zonta will continue to fight for reproductive freedom.
